	Boiler for solid fuel package	80
	Air conditioning package	80
	Fencing projects	140
	Septic tanks sealed package	bezpł.

Cassiopeia 4 house plan is a variant version of the house plan Cassiopeia with an enlarged to two positions garage. The building is two-story, a bay window dining room, arcades, balconies and loggias. Modern architecture of the building is also toned, not overdo, what adds elegance to the house. The interior of the villa is divided into a living area on the ground floor - with a combined living and dining room, lounge and partially open kitchen, and bedrooms upstairs. On the ground floor there is also a garage and a boiler room. On the first floor has managed to save a separate apartment for parents, with its own bathroom and dressing room, and children's bedrooms with a bathroom accessible from the hall. Additionally, a fourth room, can be freely arranged - a bedroom, office, or, for example laundry and drying room. The house is full of light, has a lot of glass from floor to ceiling - especially in the open to the garden living room. Partly covered terrace is a real extension of the house Cassiopeia 4 house plan has also a mirror version.
