	Septic tanks sealed package	bezpł.

Urban is a villa designed for a family of four to five people, it has simple, easy-to-build block. This is storey building with attic, covered with gable roof. Traditional block of house combined with modern styling, materials and detail and managed to get unpretentious contemporary architecture, suited to any environment. Elevations are varied by brick facing of the ground floor and wooden fragments of attic walls and originally designed windows. Additionally the top of the front and garden walls was decorated with balconies. Balcony in the back elevation is also part roofing of the terrace. Large glass windows and doors open City house interior to the garden, so the patio is a natural extension of the living room. Inside, on the ground floor a large living space was planned, with a living room, dining room, foyer and partially open kitchen. In addition on the ground floor was planned boiler room and living room - study or bedroom. In the attic there are three large bedrooms, including parents bedroom with its own walk-in closet and a large bathroom. Urban house as to its size is very spacious, and individual rooms are extensive. Simple and logical functional layout makes each square meter of the surface properly used. We have a mirror version of Urban house plan.
