	Boiler for solid fuel package	80
	Air conditioning package	80
	Fencing projects	140
	Septic tanks sealed package	bezpł.

Forget-me-not with garage 2 house plan is a variant version of Niezapominajka house plan - this time with double garage and spacious utility room. This single-story house, was designed for a family of four people. The rectangular shape of the building with added garage was covered by a gable roof. Not usable attic above the ground floor can be easily adapted to the attic. The project refers to the typical traditional style. Front of the house with accentuated entrance porch supported by two columns, with windows on the sides, reminds Polish manor house. House interior was divided into a living area, with a living room, hall with partially open kitchen, and the night part with three bedrooms and a bathroom. The advantage of this version of the house plan is transferred the boiler room behind the garage, so the house can be heated with gas, but also by alternative solid fuel. Forget-me-not with garage 2 is a great proposition for investors who want to inexpensively build a house, while leaving the possibility to finish in the second stage the additional space in the attic - or just have a big useful attic. There is also available a mirror version of this house plan.
