	Underfloor heating package	80
	Heat pump package	70
	Water jacket package	70
	Boiler for solid fuel package	80
	Air conditioning package	80
	Fencing projects	140
	Septic tanks sealed package	bezpł.

Glow house plan is a storey family house, built on a rectangular plan, covered by gabled roof, with the garage partly embedded into the body of house. This house plan is designed for a family of four people which will need with time more space for additional rooms thanks to the attic to adapt. Unpretentious modern architecture of one-story house, combines traditional form and modern materials, color and detail. The whole creates a modest, but very sympathetic look. The interior of Glow held at the ground floor, separating it into a living part - a living room, hall and partly open kitchen with pantry, and night part - with three bedrooms and a bathroom, and utility room with a garage and boiler room. In a small space we managed to organize spacious and comfortable accommodation for the household. From hall by stairs we get into the attic, which in a second step could be developed to loft with additional rooms. Glow house plan is the perfect choice for those who appreciate the convenience of an apartment on the ground floor but want to have a "reserve" space for use as an attic. This is grate project for people wanting to build a cheap, economical and energy efficient house. We has also a mirror version of the Glow house plan.
